Visa / Relocation Status: Ready to relocate to KSA & UAE

PROFILE SUMMARY

Senior .NET professional with 10+ years of experience designing, developing and supporting enterprise applications using C#, .NET Core, ASP.NET Web API and SQL Server. Strong experience in backend development, RESTful APIs, system integration, asynchronous processing and AWS-based distributed workloads using Lambda, SQS and EventBridge. Experienced in object-oriented design, production troubleshooting, performance optimization, code reviews and CI/CD practices. Hands-on experience applying SOLID principles, Dependency Injection, Repository Pattern and layered architecture in .NET applications. Currently working as a Development Team Lead, contributing to technical decisions, mentoring engineers and ensuring scalable, reliable and maintainable application delivery.

TECHNICAL SKILLS

Backend & Microsoft Technologies	C#, .NET Core, ASP.NET Core, .NET Framework, .NET 10, ASP.NET Web API, RESTful APIs, Web Services
Database	SQL Server, MySQL, Database Design, Stored Procedures, Views, Triggers, Query Optimization, SSRS
Cloud Platforms	AWS (Lambda, SQS, S3, EventBridge, CloudWatch) | GCP (Exposure)
DEVOPS / ENGINEERING	Git, Azure DevOps, CI/CD, GitHub Copilot, GitHub Spec Kit, Agile, Scrum
Data Access	Entity Framework Core, LINQ, ADO.NET
API & Security	RESTful APIs, JWT Authentication, Authorization, Role-Based Access Control, Third-Party API Integration
Testing	Unit Testing, Integration Testing, xUnit, NUnit
Distributed & Asynchronous Processing	Object-Oriented Design, System Integration, Third-Party APIs, Troubleshooting, Team Leadership, Mentoring

PROFESSIONAL EXPERIENCE

Employer	Job Role	Place	Duration
Accenture	Development Team Lead	Indore	Jan 2024 - Present
InfoBeans	Senior Software Engineer	Indore	May 2022 - Dec 2023
Swastika Investmart Indore	.NET Developer	Indore	Sep 2019 - May 2022
National Informatics Centre (NIC)	Programmer	Bhopal	Sep 2016 - Jan 2019

EXPERIENCE SUMMARY

Accenture
Jan 2024 - Present

Development Team Lead | Indore

- Lead development and production support activities for an enterprise **Transport Management System**, contributing to backend services, system integrations and technical delivery.
- Develop, maintain and support **RESTful APIs, asynchronous processing workflows using AWS Lambda, Amazon SQS and EventBridge** for enterprise transportation workloads.
- Troubleshoot complex production issues, application failures and performance bottlenecks to improve system reliability.
- Conduct **code reviews**, contribute to technical discussions and promote maintainable development practices.
- Mentor developers and collaborate with QA, business stakeholders and dependent teams throughout development.
- Use GitHub Copilot and GitHub Spec Kit to support Spec-Driven Development and engineering productivity.

InfoBeans
May 2022 - Dec 2023

Senior Software Engineer | Indore

- Developed and supported enterprise applications using **C#, .NET/.NET Core, Web API and SQL Server**.
- Designed and implemented **RESTful APIs and third-party integrations** supporting enterprise business workflows.
- Applied Object-Oriented Programming, Dependency Injection and Repository Pattern to develop reusable and maintainable components.

Swastika Investmart Indore
Sep 2019 - May 2022

.NET Developer | Indore

- Developed backend components for an **eKYC / digital onboarding platform** using .NET, REST APIs and SQL Server.
- Integrated **Aadhaar authentication, PAN verification, bank verification and digital signing** through third-party services.
- Applied layered architecture and reusable components to improve application maintainability.
- Implemented **authentication, authorization and ownership validation** for secure API access.

National Informatics Centre (NIC)
Sep 2016 - Jan 2019

Programmer | Bhopal

- Developed and maintained Madhya Pradesh Government applications, including eUparjan and the Public Distribution System (PDS).
- Developed web modules, database components, reports and integrations using .NET and SQL Server.

MAJOR PROJECTS

Transport Management System (TMS): Enterprise transportation platform involving route-generation and distributed processing workflows using AWS Lambda, Amazon SQS, EventBridge and CloudWatch, with focus on asynchronous processing, system integration and production reliability.

ACP-TMS Integration: ACP-TMS Integration: Enterprise system integration enabling data exchange between ACP and TMS through integrated application services.

eUparjan (MP Government): Contributed to the computerization of the Food Grain Procurement System for Madhya Pradesh.

Public Distribution System (PDS): Supported food-grain allotment processes with role-based access for officials.

eKYC Platform: eKYC / Digital Onboarding Platform: .NET-based platform integrating Aadhaar authentication, PAN verification, bank verification and digital signing through REST APIs and third-party services.

EDUCATION

Bachelor of Engineering (B.E.) – Computer Science Engineering
RGPV, Bhopal | CGPA: 8.55

LANGUAGES

English: Full Professional Proficiency | Hindi: Professional Working Proficiency
